## IT SECURITY ACCORDING TO ISO 27001 AND IT BASIC PROTECTION (BSI)

### Why IT Security?

Current dangers such as the loss of data, E-mail malware or DDOS attacks are increasingly threatening the security of material and non-material information in a company.

The protection of IT infrastructure serves as the basis for securing sensitive information, business processes and know-how in the company effectively and sustainably. Furthermore, the necessary confidence-building framework conditions are created to establish and maintain long-term relationships with customers, partners and investors.

#### Benefits of an IT Security Concept:

- Securing information, business processes and know-how in the company against failure, loss and theft
- Confidence-building framework conditions for customers, partners, investors and suppliers
- Useable tender criterion for orders
- Protection against penalties and fines

With an active IT security concept, you can create authenticity, integrity, confidentiality, availability and liability in your company.

### Our Expertise

The IT security experts of the steep GmbH are specialised in the conception and implementation of IT security concepts. In doing so, we develop lean processes, understandable guidelines and individually tailored security measures. We check the existing documentation, the established processes as well as the employed technology of the customer and evaluate possible deviations from the best practices of IT security standards in accordance with the results.

## IT SECURITY ACCORDING TO ISO 27001 AND IT BASIC PROTECTION (BSI)

### Our Services

In the implementation of IT security measures, we adapt our services to your individual needs.

#### Overview of our Services:

- ▼ Responsible overall project management
- ▼ Development and implementation of security processes
- ▼ Implementation of risk analyses
- ▼ Issuing documentation of processes
- ▼ Development of guidelines (policies and procedures)
- ▼ Recommendations for the implementation of technical security measures
- ▼ Installation and maintenance of IT security infrastructure
- ▼ Planning and implementation of internal IT security audits
- ▼ Consulting and support during management reviews

### Certification and Security Clearance

We prepare certifications in accordance with ISO 27001 or the IT basic protection (BSI) in an effective and solution-oriented manner. Furthermore, we accompany these with a renowned certification organization.

Our employees have a security clearance of at least level 2 (SÜ2 "Secret") and partially level 3 (SÜ3 "Top Secret") in accordance with the Security Clearance Law of the Federal Office for Constitutional Protection. They have profound long-term experience in the public, military and private sector and are composed of the following qualifications:

- ▼ Certified IT security officers
- ▼ ISMS information security officers acc. to ISO/IEC 27000
- ▼ ISMS auditors acc. to ISO/IEC 27001
- ▼ Certified data protection officers
- ▼ Technicians, computer scientists, engineers, lawyers and mathematicians

### Training and Coaching

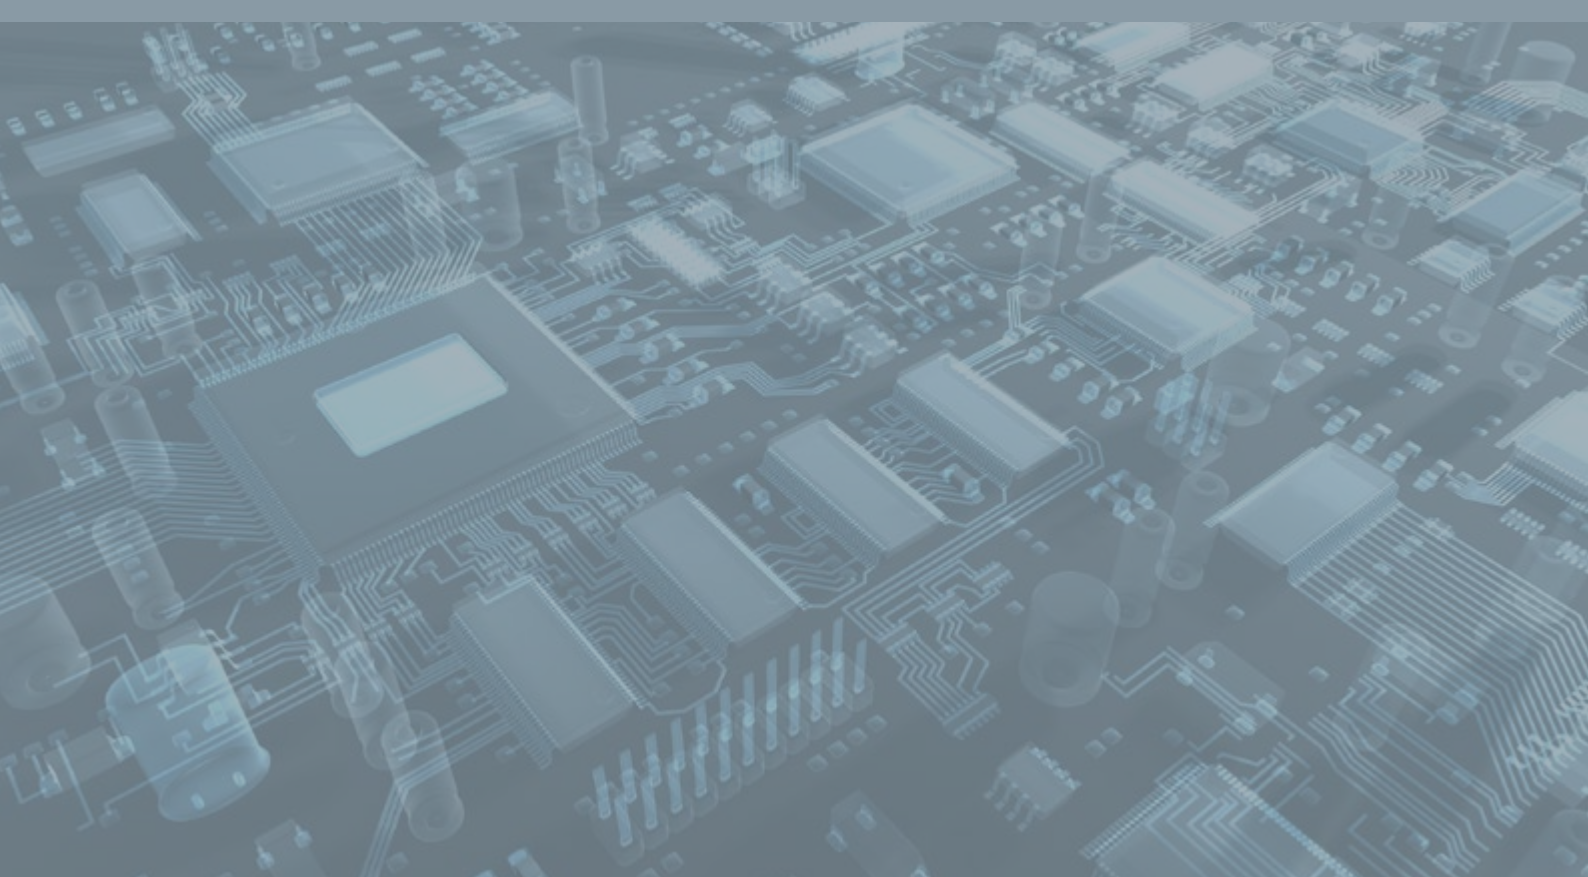

As a holistic IT security provider, we also support you in the field of training and coaching:

- ▼ Awareness trainings for employees
- ▼ Training and coaching in the field of IT security for IT employees
- ▼ IT security workshops for managers and decision makers
