## steep Virtual Classroom Training

With its Virtual Classroom Training (VCT) steep offers a solution that ideally combines the advantages of classroom training and mobile web technology. We use training concepts developed specifically for VCT. In addition, our trainers are qualified to conduct a learning goal-oriented VCT. VCT facilitates the consistent implementation of pre-structured learning concepts and the alignment of training results with personnel and business objectives.

### Enhanced Communication and Flexibility

- Training content can be imparted at the level of classroom training or as individual coaching
- No travel time and expenses, thus the physical presence at the workplace is not affected
- Standard technical requirements of a conventional PC workstation with Internet connection, headset and (laptop) camera
- Integration of the training courses into a learning management system is possible

Digital Training 4.0 –  
made by steep

steep GmbH

Justus-von-Liebig-Strasse 18  
53121 Bonn  
Germany

## Ramp Inspection Training

### Safety Assessment of Foreign / Community Aircraft (SAFA/SACA)

Regulation 965/2012 defines the implementation rules for commercial and non-commercial aircraft operations in the EU. It also aims to monitor and improve aviation safety by establishing common rules and criteria for ramp inspections of aircraft.

steep has developed a training concept based on the EU Regulation 965/2012 and the specifications for ramp inspections contained therein. Our training measures enable the ramp inspectors to carry out checks on civil aircrafts.

## Training Approach

steep is a Ramp Inspection Training Organisation (RITO) certified by the German Federal Aviation Authority. Our trainers have a broad professional qualification and many years of ramp inspection experience.

Our training enables ramp inspectors to carry out their ramp check tasks reliably and safely with professional competence and by using negotiation and communication techniques.

Additionally, our training approach is based on the use of the latest training materials and methods presented on modern media, a focus on a participant-oriented exchange of experience and a high degree of practical examples and exercises.

### Our training offers you:

- A professional, experienced and certified training organisation for the implementation of classroom and online training
- Modern methodical-didactic training concepts for classroom and online training
- Training courses based on the latest media and methods
- Continuous evaluation and development of training
- One-Stop-Shop – Technology, know-how, updates and further development from one single source

### We conduct the following trainings:

- Recurrent Training (Refresher ) – online or classroom
- Initial Training (Basics) – online (only theoretical part) or classroom
- Workshop RamUp! – online or classroom
- Operational Bridge Training (OPS) – online or classroom
- Dangerous Goods (DG) 1 day – online or classroom
- Aviation English – online or classroom
- Human Factors 2 days – online or classroom
